

Basar Maps are in use in many state and local agencies, private companies for 10 years. Last 4 years Basar has invested in creating Navigable Maps for Turkey.

Our maps are created using recent and up-to-date satellite imageries and as-built maps from local authorities. Field data collection is done with in-house MapInfo applications. The data is periodically updated.

Our teams continue to travel the whole country to keep the navigation technology utilizing the best available coverage.

Basarsoft started to use 3D 360 degrees video imagery for data collection in july 2009

Formats: GDF ASCII Sequential; MapInfo File; Shape File

General Statistics :

Population:	71.516.964 (*)
Area (km2):	786.199
# of Municipalites:	2938

Highlights
